FRONTLINER DEFENDS AGAINST COVID-19 TWICE

Learn how your family can be protected from possible second wave of coronavirus.

HEATHER M HAS A GREAT STORY TO SHARE AS A FRONTLINER...

Working as a respiratory therapist at a local Metro-Atlanta Hospital, Heather is personally challenged with auto-immune and heart disease. Since she works 12 hour shifts at the hospital, Heather had been using Atomy's HemoHIM and other immune boosting products since January 2020 to help her defend against COVID-19.

During our team conference call, Heather shared that her first experience with symptoms of the coronavirus was from March 6 – 13, 2020. Though she only had fever, she continued to take 2 packets of HemoHIM, 2 packets of Atomy Colorfood Vitamin C (1000 mg), 2 capsules of Atomy's Alaska E Omega-3 & 1 packet of Probiotics to boost up her immune system. Her fever went away and she was able to go back to work.

On April 29, she experienced chills and dry throat typical of COVID-19 patients at the hospital. She increased her HemoHIM intake to 3-4 packets per day, doubled up her Vitamin C intake to 4-5 packets (2000 – 2500 mg), and added over the counter Vitamins D & B12 to boost up her already immune compromised health.

HemoHIM - Atomy's flagship product was created by scientists from the Korean Atomic Energy Institute (KAERI). These scientists worked daily with highly toxic radiation and gamma rays that weakened their immune system.

After 8 years of research, KAERI scientists were able to formulate and patent natural plant-based ingredients that helped increase their body's natural immune system. HemoHIM boosts and modulates the production of blood and it oxygenates the body.

Infected COVID-19 patients typically experience lung inflammation & loss of oxygen. In severe cases, this inflammation may require the use of not just one – but at least two ventilators per patient. Taking HemoHIM (like Heather) may avoid the use of ventilators which are used to treat COVID-19 patients when deemed necessary.

Atomy has many natural immune boosting products that can help protect frontliners like Heather that are exposed to this virus on a daily basis. It can also help individuals and families defend against COVID-19 and feel safe against potential second wave of the virus.

To learn more about these great immune boosting products contact the Atomy member who shared this with you.

"WITHOUT THE HEMOHIM AND OTHER ATOMY IMMUNE BOOSTING PRODUCTS - I FIRMLY BELIEVE THAT I WOULD HAVE BEEN ONE OF THOSE PATIENTS WHO NEEDED A VENTILATOR TO BREATHE." - HEATHER M.
